Dear Attorney, Paralegal, and Support Staff:

The District Court of Arizona has seven (7) video capable courtrooms in the Evo A. DeConcini Courthouse in Tucson, Arizona. You may plug in any laptop at either the Lectern position or at one of the two attorney table connections.

Please contact Brian Lalley or Breda De La Paz (see telephone numbers above) 25-30 days before your trial/hearing. They will schedule a time for you (and expert witnesses if necessary) to come to the courthouse to practice with all of the equipment that you might use during your time in the courtroom. Feel free to bring the actual documents, videotapes, computer or any other evidence that you might use in court to ascertain how it will be presented. Please remember to make requests known to the judge regarding the Video Equipment you may use in trial at your Rule 16, Pre-Trial Conferences.

Please ensure that your computer is set to a 60 Hz refresh rate. Also, that your color display is not set higher than 1024 X 768 (lower is acceptable). Also, please ensure that your representative understands how to send the video signal through the VGA port on your particular laptop/computer. If you are planning on running a computer from either attorney table you must bring your own video cable (Male-to-Male, 15-pin, standard VGA) and an audio cable (1/8 inch mini jack Male to Male - Radio Shack #42-2607) if you have any sound/wave/audio files presenting from your computer. If you are planning on running a computer from the Lectern position, the cable(s) are already provided.

The following Equipment/Systems are available in each Video Courtroom:

- Computer Monitors for evidence feeds (Attorney tables, Jury Box, Witness, etc.)
- Computer Inputs (Lectern, 2 Attorney Tables, Judge's Bench)
- Document Camera / Visual Presenter / "Elmo"
- DVD (video DVDs only, NOT data DVDs or Video CDs)
- VCR (S-VHS or VHS)
- Audio Cassette Player (standard speed only)
- Other Video Device hook-ups (DVD, CD, Laser Disk, 2nd Computer, etc.)
at the Lectern position
- Pointmaker Annotation System (Lectern and Witness positions)
- Realtime Transcription System (LIVENOTES, www.livenote.com)
- Video Printer for printing presented evidence
- Video Teleconference Unit (remote witness) in courtroom
- Audio Telephonic Conferences (up to six participants)
- Portable Presentation System (NOMAD)
